**FOR RELEASE JANUARY 4, 2022**

### **Investigate and develop new skills with Coder Dojo mentorship**

Do you know someone age 9 to 14 who wants to learn computer coding skills for web, app, and game design? Kingston Frontenac Public Library's Coder Dojo program is a fun, welcoming environment for children and teens to work with volunteer mentors to learn the skills of interest to them. Mentors will support youth participants in developing skills in a project of their choosing, and/or inspire them to investigate new skills and languages to further their coding journey.

"We are excited to be opening up a new session for Coder Dojo," said Kristen Lemay, Teen and New Adult Services Librarian. "Pairing new coders with skilled volunteers allows our community to connect in a way that is beneficial for both groups. New coders help our volunteers become better mentors, and our volunteers help these young coders expand their knowledge."

The program is a four-week, virtual series starting Tuesday, Jan. 18. Free registration is required, and registering for the first session will automatically sign participants up for the duration of the program. Register online at <https://calendar.kfpl.ca/event/5888338> or by phone at (613) 549-8888.

Registrants will be emailed a Zoom link immediately upon registration and will need to download Zoom in advance.
