FOR RELEASE JULY 4, 2023

Engage your environmental enthusiasm with Ontariogreen's enlightening presentations

Expand your curiosity, empower eco-friendly decisions and make learning about the environment an unforgettable experience!

In partnership with the Kingston Frontenac Public Library, Ontariogreen will deliver two engaging presentations, offering valuable insights for different age groups.

On July 17, children aged six and above can join an exciting online talk, Birds: Our Only Surviving Dinosaurs. Attendees will have the unique opportunity to learn about the connection between these ancient creatures and the feathered friends we observe today.

On July 18, people ages 13 and above can participate in the online session Designing for Biodiversity, gaining practical knowledge on designing personal green spaces that support biodiversity. Information about selecting native plants, spatial layout considerations, and building structures will help sustain biodiversity for years.

The sessions will be hosted online. Registration for both presentations is now open and can be completed through the following links.

Birds: Our Only Surviving Dinosaurs - July 17 from 2:30-3:15 p.m.

Designing Biodiversity - July 18 from 7-8 p.m.

<https://calendar.kfpl.ca/event/8224517>

"Don't miss this unique opportunity to learn from Ontariogreen experts and expand your understanding of the environment," said Jake Miller, Librarian, Adult Programming. "Who wouldn't want to know how a giant reptile became a blue jay? Learning how to sustain biodiversity in your yard is also an exciting project. We can do so much to help the planet by learning about and changing our backyards."
